

# Time to Recycle, Renew and Reuse

Time to *Recycle, Reuse and Renew* in your home and at school?

## Did you know?

Every year we fill enough garbage trucks in the United States to stretch halfway to the moon! Recycle your bottles, paper, plastic, and cans whenever you can!  
(Source: Clean Air Council)

Let's start recycling at home:

- What do you already do in your home to recycle?
- What other kind of things can be recycled or used again?
- What is something you can start recycling today?
- Draw a picture about something that you do to recycle and help our planet. Make it as bright and colorful as possible. Put your picture on the refrigerator as a great way to remind all in the family to recycle every day.
- Write a newspaper story that tells all your friends what you and your family are doing to recycle. What will your headline be?
